About Doing Business

The Doing Business project provides objective measures of business regulations and their enforcement across 190 economies and selected cities at the subnational and regional level.

The Doing Business project, launched in 2002, looks at domestic small and medium-size companies and measures the regulations applying to them through their life cycle.

Doing Business captures several important dimensions of the regulatory environment as it applies to local firms. It provides quantitative indicators on regulation for starting a business, dealing with construction permits, getting electricity, registering property, getting credit, protecting minority investors, paying taxes, trading across borders, enforcing contracts and resolving insolvency. Doing Business also measures features of labor market regulation. Although Doing Business does not present rankings of economies on the labor market regulation indicators or include the topic in the aggregate ease of doing business score or ranking on the ease of doing business, it does present the data for these indicators.

By gathering and analyzing comprehensive quantitative data to compare business regulation environments across economies and over time, Doing Business encourages economies to compete towards more efficient regulation; offers measurable benchmarks for reform; and serves as a resource for academics, journalists, private sector researchers and others interested in the business climate of each economy.

In addition, Doing Business offers detailed subnational reports, which exhaustively cover business regulation and reform in different cities and regions within a nation. These reports provide data on the ease of doing business, rank each location, and recommend reforms to improve performance in each of the indicator areas. Selected cities can compare their business regulations with other cities in the economy or region and with the 190 economies that Doing Business has ranked.

The first Doing Business report, published in 2003, covered 5 indicator sets and 133 economies. This year’s report covers 11 indicator sets and 190 economies. Most indicator sets refer to a case scenario in the largest business city of each economy, except for 11 economies that have a population of more than 100 million as of 2013 (Bangladesh, Brazil, China, India, Indonesia, Japan, Mexico, Nigeria, Pakistan, the Russian Federation and the United States) where Doing Business also collected data for the second largest business city. The data for these 11 economies are a population-weighted average for the 2 largest business cities. The project has benefited from feedback from governments, academics, practitioners and reviewers. The initial goal remains: to provide an objective basis for understanding and improving the regulatory environment for business around the world.

More about Doing Business (PDF, 5MB)
Ease of Doing Business in Slovenia

Region: OECD high income
Income Category: High income
Population: 2,066,748
City Covered: Ljubljana

DB 2019 Rank: 190
DB 2019 Ease of doing business score: 75.61

DB 2019 Ease of Doing Business Score

77.80: Regional Average (OECD high income)
76.10: Czech Republic (Rank: 35)
75.61: Slovenia (Rank: 40)
72.56: Italy (Rank: 51)
72.28: Hungary (Rank: 53)
69.51: Albania (Rank: 63)

Note: The ease of doing business score captures the gap of each economy from the best regulatory performance observed on each of the indicators across all economies in the Doing Business sample since 2005. An economy’s ease of doing business score is reflected on a scale from 0 to 100, where 0 represents the lowest and 100 represents the best performance. The ease of doing business ranking ranges from 1 to 190.

Rankings on Doing Business topics - Slovenia

Ease of Doing Business Score on Doing Business topics - Slovenia
Starting a Business

This topic measures the number of procedures, time, cost and paid-in minimum capital requirement for a small- to medium-sized limited liability company to start up and formally operate in each economy’s largest business city.

To make the data comparable across 190 economies, *Doing Business* uses a standardized business that is 100% domestically owned, has start-up capital equivalent to 10 times the income per capita, engages in general industrial or commercial activities and employs between 10 and 50 people one month after the commencement of operations, all of whom are domestic nationals. Starting a Business considers two types of local limited liability companies that are identical in all aspects, except that one company is owned by 5 married women and the other by 5 married men. The ranking of economies on the ease of starting a business is determined by sorting their scores for starting a business. These scores are the simple average of the scores for each of the component indicators.

The most recent round of data collection for the project was completed in May 2018. See the methodology for more information.

<table>
<thead>
<tr>
<th>What the indicators measure</th>
<th>Case study assumptions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Procedures to legally start and formally operate a company (number)</td>
<td>To make the data comparable across economies, several assumptions about the business and the procedures are used. It is assumed that any required information is readily available and that the entrepreneur will pay no bribes.</td>
</tr>
<tr>
<td>- Preregistration (for example, name verification or reservation, notarization)</td>
<td><strong>The business:</strong></td>
</tr>
<tr>
<td>- Registration in the economy’s largest business city</td>
<td>- Is a limited liability company (or its legal equivalent). If there is more than one type of limited liability company in the economy, the most common among domestic firms is chosen. Information on the most common form is obtained from incorporation lawyers or the statistical office.</td>
</tr>
<tr>
<td>- Postregistration (for example, social security registration, company seal)</td>
<td>- Operates in the economy’s largest business city. For 11 economies the data are also collected for the second largest business city.</td>
</tr>
<tr>
<td>- Obtaining approval from spouse to start a business or to leave the home to register the company</td>
<td>- The entire office space is approximately 929 square meters (10,000 square feet).</td>
</tr>
<tr>
<td>- Obtaining any gender specific document for company registration and operation or national identification card</td>
<td>- Is 100% domestically owned and has five owners, none of whom is a legal entity; has a start-up capital of 10 times income per capita and has a turnover of at least 100 times income per capita.</td>
</tr>
<tr>
<td>Time required to complete each procedure (calendar days)</td>
<td>- Performs general industrial or commercial activities, such as the production or sale of goods or services to the public. The business does not perform foreign trade activities and does not handle products subject to a special tax regime, for example, liquor or tobacco. It does not use heavily polluting production processes.</td>
</tr>
<tr>
<td>- Does not include time spent gathering information</td>
<td>- Leases the commercial plant or offices and is not a proprietor of real estate and the amount of the annual lease for the office space is equivalent to the income per capita.</td>
</tr>
<tr>
<td>- Each procedure starts on a separate day (2 procedures cannot start on the same day)</td>
<td>- Does not qualify for investment incentives or any special benefits.</td>
</tr>
<tr>
<td>- Procedures fully completed online are recorded as ½ day</td>
<td>- Has at least 10 and up to 50 employees one month after the commencement of operations, all of whom are domestic nationals.</td>
</tr>
<tr>
<td>- Procedure is considered completed once final document is received</td>
<td>- Has a company deed that is 10 pages long.</td>
</tr>
<tr>
<td>- No prior contact with officials</td>
<td><strong>The owners:</strong></td>
</tr>
<tr>
<td>Cost required to complete each procedure (% of income per capita)</td>
<td>- Have reached the legal age of majority. If there is no legal age of majority, they are assumed to be 30 years old.</td>
</tr>
<tr>
<td>- Official costs only, no bribes</td>
<td>- Are sane, competent, in good health and have no criminal record.</td>
</tr>
<tr>
<td>- No professional fees unless services required by law or commonly used in practice</td>
<td>- Are married and the marriage is monogamous and registered with the authorities.</td>
</tr>
<tr>
<td>Paid-in minimum capital (% of income per capita)</td>
<td>- Where the answer differs according to the legal system applicable to the woman or man in question (as may be the case in economies where there is legal plurality), the answer used will be the one that applies to the majority of the population.</td>
</tr>
<tr>
<td>- Funds deposited in a bank or with third party before registration or up to 3 months after incorporation</td>
<td><strong>Case study assumptions</strong></td>

DB 2019 Starting a Business Score

Note: The ranking of economies on the ease of starting a business is determined by sorting their scores for starting a business. These scores are the simple average of the scores for each of the component indicators.
This symbol is shown beside procedure numbers that take place simultaneously with the previous procedure.

Note: Online procedures account for 0.5 days in the total time calculation. For economies that have a different procedure list for men and women, the graph shows the time for women. For more information on methodology, see the Doing Business website (http://doingbusiness.org/en/methodology). For details on the procedures reflected here, see the summary below.
### Details - Starting a Business in Slovenia - Procedure, Time and Cost

<table>
<thead>
<tr>
<th>No.</th>
<th>Procedures</th>
<th>Time to Complete</th>
<th>Associated Costs</th>
</tr>
</thead>
</table>
| 1   | Deposit capital in a bank account and get a receipt from the bank  
     
     *Agency*: Commercial Bank  
     
     The minimum founding capital is EUR 7,500. The founding capital or the base capital contribution can be paid in cash or as a non-cash contribution. Non-cash contribution includes movables, real property, rights or any other non-cash assets. Before filing the application for entry, the partner must provide at least one-quarter of the nominal capital, and the total value of all guaranteed contributions must be at least EUR 7,500. The minimum value of a single share is EUR 50.  
     
     In order for the entrepreneurs to be able to file the application for registration, they must demonstrate a certificate on the paid-in founding capital. | 1 day | no charge |
| 2   | Register at a VEM entry point or at a Notary Public  
     
     *Agency*: AJPES  
     
     Founders may establish a LLC at the VEM point under two conditions: (1) all the contributions have to be paid in cash and prior to the registration of the company (2) the articles of association have to be drafted in a special form (only mandatory and most common provisions can be incorporated in this form). Registration can be also done online through eVEM, however it is only available for companies with one shareholder.  
     
     If the above conditions are not met, the company can be registered at the Public Notary.  
     
     In order to found an LLC, founders have to visit the VEM entry point in person, as an authorized person has to carry out their identification.  
     
     • Limited Liability companies can go directly to the VEM, the deed is sent to point VEM or to the registration body through electronic channels, it must be signed by means of a safe electronic signature with qualified certificate (the qualified certificate is the special digital certificate for identity check and electronic operation at the VEM point services).  
     
     • Standard Articles of Association: help the founders to draft the articles of association, verify their signatures where necessary and draft the corresponding preposition for registration of the company at the court register. However it is still the common practice to have the statutes and the article of association prepared and certified by the notary.  
     
     • Publication: Even if this requirement is not mandatory anymore, E-VEM allows for the company information to be available online.  
     
     • Register with the Statistical Office of Slovenia: the court register automatically forwards all the required information to AJPES. The information is then entered in the Business Register and published online. Court register and business register are technically united in one information base and are now both run by AJPES.  
     
     • Register with the tax administration - the tax information is transmitted through E-VEM and data is entered automatically when it is received from E-VEM.  
     
     • Register as VAT payer.  
     
     • Register with the Health Institute.  
     
     • Register with the Pension and Disability Insurance Institute of Slovenia (ZPIZ).  
     
     The founders have to obtain a written permission of the owner of the real estate where the company will operate (address of the company). The signature of the owner has to be certified.  
     
     The officer at VEM point completes all relevant registration forms, prints them and provides to founders for signing. Once signed, documents are scanned and re-uploaded into the system. VEM sends the data automatically to the Court Register at the District level. Decision from the court is typically obtained on the next business day, while registration confirmation from other authorities (tax authority, statistical office, etc) usually takes longer. | 5 days | no charge |
3 Register the company in the Register of Actual Owners  

**Agency**: AJPES  

The Prevention of Money Laundering and Terrorist Financing Act (in Slovenian: Zakon o preprečevanju pranja denarja in financiranja terorizma) requires that all businesses with more than one shareholder or director report the actual owners. This requirement applies to all companies and all types of legal entities.

The registry of actual owners is administered by AJPES. The registry was established on December 11, 2017, and all existing companies were obliged to register by January 19, 2018. Newly established companies are required to register within 8 days from incorporation.

The registration is done online by submitting a specific form containing name and surname of shareholders, the scope of the start up capital, and the tax number of the company.

Confirmation of registration is provided in the next business day.

Dealing with Construction Permits

This topic tracks the procedures, time and cost to build a warehouse—including obtaining necessary the licenses and permits, submitting all required notifications, requesting and receiving all necessary inspections and obtaining utility connections. In addition, the Dealing with Construction Permits indicator measures the building quality control index, evaluating the quality of building regulations, the strength of quality control and safety mechanisms, liability and insurance regimes, and professional certification requirements. The most recent round of data collection was completed in May 2018. See the methodology for more information.

<table>
<thead>
<tr>
<th>What the indicators measure</th>

</tr>
</thead>
<tbody>
<tr>
<td><strong>Procedures to legally build a warehouse (number)</strong></td>
<td>To make the data comparable across economies, several assumptions about the construction company, the warehouse project and the utility connections are used.</td>
</tr>
<tr>
<td>• Submitting all relevant documents and obtaining all necessary clearances, licenses, permits and certificates</td>
<td><strong>The construction company (BuildCo):</strong></td>
</tr>
<tr>
<td>• Submitting all required notifications and receiving all necessary inspections</td>
<td>- Is a limited liability company (or its legal equivalent) and operates in the economy’s largest business city. For 11 economies the data are also collected for the second largest business city.</td>
</tr>
<tr>
<td>• Obtaining utility connections for water and sewerage</td>
<td>- Is 100% domestically and privately owned; has five owners, none of whom is a legal entity. Has a licensed architect and a licensed engineer, both registered with the local association of architects or engineers. BuildCo is not assumed to have any other employees who are technical or licensed experts, such as geological or topographical experts.</td>
</tr>
<tr>
<td>• Registering and selling the warehouse after its completion</td>
<td>- Owns the land on which the warehouse will be built and will sell the warehouse upon its completion.</td>
</tr>
<tr>
<td><strong>Time required to complete each procedure (calendar days)</strong></td>
<td><strong>The warehouse:</strong></td>
</tr>
<tr>
<td>• Does not include time spent gathering information</td>
<td>- Will be used for general storage activities, such as storage of books or stationery.</td>
</tr>
<tr>
<td>• Each procedure starts on a separate day—though procedures that can be fully completed online are an exception to this rule</td>
<td>- Will have two stories, both above ground, with a total constructed area of approximately 1,300.6 square meters (14,000 square feet). Each floor will be 3 meters (9 feet, 10 inches) high and will be located on a land plot of approximately 929 square meters (10,000 square feet) that is 100% owned by BuildCo, and the warehouse is valued at 50 times income per capita.</td>
</tr>
<tr>
<td>• Procedure is considered completed once final document is received</td>
<td>- Will have complete architectural and technical plans prepared by a licensed architect. If preparation of the plans requires such steps as obtaining further documentation or getting prior approvals from external agencies, these are counted as procedures.</td>
</tr>
<tr>
<td>• No prior contact with officials</td>
<td>- Will take 30 weeks to construct (excluding all delays due to administrative and regulatory requirements).</td>
</tr>
<tr>
<td><strong>Cost required to complete each procedure (% of income per capita)</strong></td>
<td><strong>The water and sewerage connections:</strong></td>
</tr>
<tr>
<td>• Official costs only, no bribes</td>
<td>- Will be 150 meters (492 feet) from the existing water source and sewer tap. If there is no water delivery infrastructure in the economy, a borehole will be dug. If there is no sewerage infrastructure, a septic tank in the smallest size available will be installed or built.</td>
</tr>
<tr>
<td><strong>Building quality control index (0-15)</strong></td>
<td>- Will have an average water use of 662 liters (175 gallons) a day and an average wastewater flow of 568 liters (150 gallons) a day. Will have a peak water use of 1,325 liters (350 gallons) a day and a peak wastewater flow of 1,136 liters (300 gallons) a day.</td>
</tr>
<tr>
<td>• Quality of building regulations (0-2)</td>
<td>- Will have a constant level of water demand and wastewater flow throughout the year; will be 1 inch in diameter for the water connection and 4 inches in diameter for the sewerage connection.</td>
</tr>

<th>Procedures</th>
<th>Time to Complete</th>
<th>Associated Costs</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Obtain the location information</td>
<td>0.5 days</td>
<td>EUR 18</td>
</tr>
</tbody>
</table>

*Agency: City of Ljubljana*

Before preparation of the project documentation, either the investor or the project manager acquires location information. The location information includes data on plot conditions, as determined by the municipal Spatial Acts (zoning laws), and data on the intended use of the area.

A copy of the cadastral plan of the plot should be attached to the application for the location information.

According to the Spatial Planning Act amended in 2008, the applicant is not obliged to obtain the location information any more. Also, according to the Construction Act amended in 2008, the location information is no longer a part of the project documentation for building permit. All data included in the location information must be obtained ex officio by the local administration that issues the building permit. However, in practice obtaining the location information is still done by most applicants to provide an additional guarantee. Furthermore, the location information provides a clear list of project approvals that must be obtained in the process of obtaining the building permit for the area in question. Location documents can be obtained online on http://www.gu.gov.si/en. This has allowed anybody to obtain land maps and geodetic data directly online.

| 2   | Obtain project conditions from water and sewage provider                    | 21 days          | no charge        |

*Agency: JP Vodovod-Kanalizacija d.o.o*

BuildCo must obtain project conditions from the water and sewage provider - JP Vodovod-Kanalizacija d.o.o. before the project design is completed in order to define all special requirements, which should be taken into consideration while preparing the project design with respect to the connecting of the building to the water and sewage network.

With the conditions, BuildCo then develops the building project which it submits to the water sewage provider for their approval.

| 3   | Obtain project conditions from electricity provider                         | 21 days          | no charge        |

*Agency: Elektro Ljubljana*

BuildCo must obtain preliminary conditions from electricity providing authority. Such conditions are issued based on the preliminary project design drawings and other documents. They should be obtained to define all special requirements which should be taken into consideration while preparing the project design with respect to the connecting of the building to the electricity network.

| 4   | Obtain geotechnical study of the land plot                                 | 14 days          | EUR 1,500        |

*Agency: Private licensed company*

The geotechnical study is a part of the application for obtaining a construction permit.

| 5   | Obtain topographic survey of the land plot                                 | 14 days          | EUR 500          |

*Agency: Private licensed company*

The topographic survey is a required part of the application for obtaining a construction permit.

| 6   | Obtain project approval from water and sewage provider                    | 30 days          | no charge        |

*Agency: JP Vodovod-Kanalizacija d.o.o*

The water and sewage provider must issue its approval (or disapproval) to the project solutions in 30 days from submitting the application. If the agency’s approval (disapproval) is not issued within the 30 days, it is deemed that the agency has given its approval (i.e. the investor may start with the building permit obtaining procedure without attaching the project approval to the application).

<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Contributions prescribed by law have been paid (i.e. administrative tax for the application for the building permit, public utilities charge, compensation for degradation of the environment)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>The building permit is no longer valid if the investor fails to commence construction of the building in three years (two years in the case of the less complex constructions) from the date the building permit became final.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>According to the law, the administrative unit shall issue a building permit in 2 months (60 days) from the day the application (including all obligatory attachments) was submitted. This can take longer in practice but the legal time limit of 60 days is generally met.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>9</td>
<td>Hire an external supervising engineer to conduct supervision on construction</td>
<td>Private Supervising Engineer</td>
<td>1 day</td>
<td>EUR 15,302</td>
</tr>
<tr>
<td></td>
<td>According to the Constructions Act (Official Gazette of the Republic of Slovenia, No. 110/2002, as amended, ZGO-1), the investor needs to ensure independent supervision of construction. The supervisor may not be involved in the construction of the building which it supervises.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>10</td>
<td>Hire a geodesist company to conduct marking out before construction and after construction</td>
<td>Authorized Geodesist Company</td>
<td>1 day</td>
<td>EUR 960</td>
</tr>
<tr>
<td></td>
<td>BuildCo would be using the services of a licensed geodesist company or specialist before the construction and after the new building is completed. Before construction, BuildCo must ensure that the construction is marked out according to the building permit. A written notice stating the date and the place of marking out shall be sent to the municipal administration at least 8 days before commencement of the works. The associated cost depends on the size of the construction and on the number of corners. This procedure is a prerequisite for the Technical Examination by the Administration Unit Ljubljana.</td>
<td></td>

Getting Electricity

This topic measures the procedures, time and cost required for a business to obtain a permanent electricity connection for a newly constructed warehouse. Additionally, the reliability of supply and transparency of tariffs index measures reliability of supply, transparency of tariffs and the price of electricity. The most recent round of data collection for the project was completed in May 2018. See the methodology for more information.

What the indicators measure

Procedures to obtain an electricity connection (number)
- Submitting all relevant documents and obtaining all necessary clearances and permits
- Completing all required notifications and receiving all necessary inspections
- Obtaining external installation works and possibly purchasing material for these works
- Concluding any necessary supply contract and obtaining final supply

Time required to complete each procedure (calendar days)
- Is at least 1 calendar day
- Each procedure starts on a separate day
- Does not include time spent gathering information
- Reflects the time spent in practice, with little follow-up and no prior contact with officials

Cost required to complete each procedure (% of income per capita)
- Official costs only, no bribes
- Value added tax excluded

The reliability of supply and transparency of tariffs index (0-8)
- Duration and frequency of power outages (0-3)
- Tools to monitor power outages (0-1)
- Tools to restore power supply (0-1)
- Regulatory monitoring of utilities’ performance (0-1)
- Financial deterrents limiting outages (0-1)
- Transparency and accessibility of tariffs (0-1)

Price of electricity (cents per kilowatt-hour)*
- Price based on monthly bill for commercial warehouse in case study

*Note: Doing Business measures the price of electricity, but it is not included in the ease of doing business score nor the ranking on the ease of getting electricity.

Case study assumptions

To make the data comparable across economies, several assumptions about the warehouse, the electricity connection and the monthly consumption are used.

The warehouse:
- Is owned by a local entrepreneur and is used for storage of goods.
- Is located in the economy’s largest business city. For 11 economies the data are also collected for the second largest business city.
- Is located in an area where similar warehouses are typically located and is in an area with no physical constraints. For example, the property is not near a railway.
- Is a new construction and is being connected to electricity for the first time.
- Has two stories with a total surface area of approximately 1,300.6 square meters (14,000 square feet). The plot of land on which it is built is 929 square meters (10,000 square feet).

The electricity connection:
- Is a permanent one with a three-phase, four-wire Y connection with a subscribed capacity of 140-kilo-volt-ampere (kVA) with a power factor of 1, when 1 kVA = 1 kilowatt (kW).
- Has a length of 150 meters. The connection is to either the low- or medium-voltage distribution network and is either overhead or underground, whichever is more common in the area where the warehouse is located and requires works that involve the crossing of a 10-meter road (such as by excavation or overhead lines) but are all carried out on public land. There is no crossing of other owners’ private property because the warehouse has access to a road.
- Does not require work to install the internal wiring of the warehouse. This has already been completed up to and including the customer’s service panel or switchboard and the meter base.

The monthly consumption:
- It is assumed that the warehouse operates 30 days a month from 9:00 a.m. to 5:00 p.m. (8 hours a day), with equipment utilized at 80% of capacity on average and that there are no electricity cuts (assumed for simplicity reasons) and the monthly energy consumption is 26,880 kilowatt-hours (kWh); hourly consumption is 112 kWh.
- If multiple electricity suppliers exist, the warehouse is served by the cheapest supplier.
- Tariffs effective in January of the current year are used for calculation of the price of electricity for the warehouse. Although January has 31 days, for calculation purposes only 30 days are used.

**Note:**

- If the duration and frequency of outages is 100 or less, the economy is eligible to score on the Reliability of supply and transparency of tariff index.
- If the duration and frequency of outages is not available, or is over 100, the economy is not eligible to score on the index.
- If the minimum outage time considered for SAIDI/SAIFI is over 5 minutes, the economy is not eligible to score on the index.
Registering Property

This topic examines the steps, time and cost involved in registering property, assuming a standardized case of an entrepreneur who wants to purchase land and a building that is already registered and free of title dispute. In addition, the topic also measures the quality of the land administration system in each economy. The quality of land administration index has five dimensions: reliability of infrastructure, transparency of information, geographic coverage, land dispute resolution, and equal access to property rights. The most recent round of data collection for the project was completed in May 2018. See the methodology for more information.

5 Payment and procedure of the real estate transfer tax or VAT tax at the Financial Administration Office
Agency: Financial Administration of the Republic of Slovenia (FURS)
The VAT does not have to be paid if the transaction of real estate is taxed by Real Estate Transfer Tax. VAT is obligatory only for new real estate. The Real Estate Transfer Tax Procedure is as follows: The taxpayer has to insert the tax declaration within 15 days at the Tax Authority, after the deed of sale is signed.

The Tax Authority has to assess the real estate transfer tax within 30 days after receiving the declaration. When the real estate transfer tax is assessed on the basis of the selling price, the tax must be paid at the competent Financial Administration Office within 30 days after the receipt of the decision on tax assessment.

On 11.12.2015, the National Gazette of Republic Slovenia, no. 96/15 published Act Amending the Implementation of the Republic of Slovenia Budget for 2016 and 2017, according to which, the VAT rate for the transfer of property (obligatory for new real estate) is charged and paid the same as on the basis of Implementation of the Republic of Slovenia's Budget for 2014 and 2015, at the general rate of 22% of the tax base, except the transfer of apartments, residential and other buildings for permanent living and other parts of buildings as part of social policy, renovation and repair, which is 9.5%.

| 6 Certification of signatures and submit proposal to Land Registry | 1 day | EUR 100; (Notary fees for the land registry case are (in Euros) following the fee schedule: For a contract value under EUR 4,590, the fee is EUR 5 (+ VAT) From EUR 4,590, the fee is EUR 14 (+ VAT) From EUR 20,655, the fee is EUR 23 (+ VAT) From EUR 68,850, the fee is EUR 46 (+ VAT) From EUR 150,000, the fee is EUR 56 (+ VAT) From EUR 200,000, the fee is EUR 66 (+ VAT) From EUR 250,000, the fee is EUR 76 (+ VAT) From EUR 300,000, the fee is EUR 86 (+ VAT) From EUR 350,000, the fee is EUR 96 (+ VAT) From EUR 400,000, the fee is EUR 100 (+ VAT)) |
Takes place simultaneously with previous procedure.

7 Entry of the proposal by the Land Registry
Agency: Land Registry (Local court)
The land registry court (Local court) initiates the registration process for the entry of title in the land register, on the basis of the land registry proposal. The amendments to the Land Registry Act adopted on 27 March 2009 and implemented on 1 May 2011 have enacted the mandatory submission of proposal with appendixes in electronic form to the courts. The land registry procedure is completely computerized. The submissions should be entered via a notary public or attorneys and real-estate agencies acting on behalf of the applicant. However, the amended Land Register Act still provides some exceptions that registrations may also be submitted directly by the applicant. Simultaneously, the amendments have transferred the responsibility for depositing original documents (e.g. contracts) that were attached to the submissions from the courts to the notary, whereby the notary's confirmation of authenticity renders the evidence value of the electronic version equal to that of the original. The amendments enable free access via a web-portal to the contents of the land register, including pending notations, and to land register extracts, neither of which were free of cost prior to the reform. The proposal is sent to a central unit of the court which automatically assigns it to the least burdened local court. Once the proposal is filed with the competent land registry court, the registration process is initiated ex officio and the priority of entry is ensured by way of a land registry seal. The seal in the land registry that safeguards the priority order is obtained immediately. The priority order takes effect of the day on which the proposal has been filed.

The buyer can theoretically dispose of the property as soon as the purchase agreement is signed and the (direct or indirect) possession of the property is obtained by the buyer. The possibility to dispose with the property at this stage would depend on the other party to the new contract.

The buyer whose title is not yet entered into the land register but has already obtained the possession of the property enjoys the position of a proprietary possessor in good faith - the presumed owner. The latter has, among others, the right to claim the return of a property in the event of its dispossession from a proprietary possessor in good faith who has the property with a weaker legal title. In any case the buyer has a possibility to claim the return of the purchase price but has no claims under the law of property until the title is entered into the land register.

Since May 1st, 2011 the proposal has to be filled in an electronic form. The Land registration fee had also changed and fees are not in points anymore.

The documentation shall include:
- Land registry proposal
- Document including the registration clause with certified signature of the seller (obtained in Procedure 5)
- Confirmation of the payment of the tax or taxes (obtained in Procedure 3)
- Purchase contract (if not same as document including the registration clause)

31 days 5 EUR 287; (EUR 37 + EUR 9.5 VAT (notary fee for inscription in registry) + Registration court fees according to sliding scale (EUR 250 for property between 750,000 EUR and 1,000,000 EUR))

-Court Fees - For property between 750,000 EUR and 1,000,000 EUR the fee is 250 EUR. Court fees, reflecting the Act Amending the Judicial Fees Act - ZST-1C (Official Gazette of the Republic of Slovenia, No. 30/16 of 25 April 2016).

-Notary fee for preparation of land register proposal is 37 EUR (Notary Fees including latest Dopolnitev Notarske tarife - Official Gazette of the Republic of Slovenia, No. 15/14 of 28 February 2014)

For a standard land dispute between two local businesses over tenure rights of a property worth 50 times gross national income (GNI) per capita and located in the largest business city, what court would be in charge of the case in the first instance?

| Local court Ljubljana (Okrajno sodišče v Ljubljani), http://www.sodisce.si/okraj/ |

How long does it take on average to obtain a decision from the first-instance court for such a case (without appeal)?

| Between 1 and 2 years |

Are there any statistics on the number of land disputes in the first instance?

| Yes |

Number of land disputes in the largest business city in 2017:

| 1517.0 |

**Equal access to property rights index (-2-0)**

| 0.0 |

Do unmarried men and unmarried women have equal ownership rights to property?

| Yes |

Do married men and married women have equal ownership rights to property?

| Yes |
Getting Credit

This topic explores two sets of issues—the strength of credit reporting systems and the effectiveness of collateral and bankruptcy laws in facilitating lending. The most recent round of data collection for the project was completed in May 2018. See the methodology for more information.

<table>
<thead>
<tr>
<th>What the indicators measure</th>
<th>Case study assumptions</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Strength of legal rights index (0-12)</strong></td>
<td>Doing Business assesses the sharing of credit information and the legal rights of borrowers and lenders with respect to secured transactions through 2 sets of indicators. The depth of credit information index measures rules and practices affecting the coverage, scope and accessibility of credit information available through a credit registry or a credit bureau. The strength of legal rights index measures the degree to which collateral and bankruptcy laws protect the rights of borrowers and lenders and thus facilitate lending. For each economy it is first determined whether a unitary secured transactions system exists. Then two case scenarios, case A and case B, are used to determine how a nonpossessory security interest is created, publicized and enforced according to the law. Special emphasis is given to how the collateral registry operates (if registration of security interests is possible). The case scenarios involve a secured borrower, company ABC, and a secured lender, BizBank.</td>
</tr>
<tr>
<td>• Rights of borrowers and lenders through collateral laws (0-10)</td>
<td>In some economies the legal framework for secured transactions will allow only case A or case B (not both) to apply. Both cases examine the same set of legal provisions relating to the use of movable collateral.</td>
</tr>
<tr>
<td>• Protection of secured creditors’ rights through bankruptcy laws (0-2)</td>
<td>Several assumptions about the secured borrower (ABC) and lender (BizBank) are used:</td>
</tr>
<tr>
<td><strong>Depth of credit information index (0-8)</strong></td>
<td>- ABC is a domestic limited liability company (or its legal equivalent).</td>
</tr>
<tr>
<td>• Scope and accessibility of credit information distributed by credit bureaus and credit registries (0-8)</td>
<td>- ABC has up to 50 employees.</td>
</tr>
<tr>
<td><strong>Credit bureau coverage (% of adults)</strong></td>
<td>- ABC has its headquarters and only base of operations in the economy’s largest business city. For 11 economies the data are also collected for the second largest business city.</td>
</tr>
<tr>
<td>• Number of individuals and firms listed in largest credit bureau as a percentage of adult population</td>
<td>- Both ABC and BizBank are 100% domestically owned.</td>
</tr>
<tr>
<td><strong>Credit registry coverage (% of adults)</strong></td>
<td>The case scenarios also involve assumptions. In case A, as collateral for the loan, ABC grants BizBank a nonpossessory security interest in one category of movable assets, for example, its machinery or its inventory. ABC wants to keep both possession and ownership of the collateral. In economies where the law does not allow nonpossessory security interests in movable property, ABC and BizBank use a fiduciary transfer-of-title arrangement (or a similar substitute for nonpossessory security interests).</td>
</tr>
<tr>
<td>• Number of individuals and firms listed in credit registry as a percentage of adult population</td>
<td>In case B, ABC grants BizBank a business charge, enterprise charge, floating charge or any charge that gives BizBank a security interest over ABC’s combined movable assets (or as much of ABC’s movable assets as possible). ABC keeps ownership and possession of the assets.</td>
</tr>

Protecting Minority Investors

This topic measures the strength of minority shareholder protections against misuse of corporate assets by directors for their personal gain as well as shareholder rights, governance safeguards and corporate transparency requirements that reduce the risk of abuse. The most recent round of data collection for the project was completed in May 2018. See the methodology for more information.

<table>
<thead>
<tr>
<th>What the indicators measure</th>
<th>Case study assumptions</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Extent of disclosure index (0–10): Review and approval requirements for related-party transactions; Disclosure requirements for related-party transactions</td>
<td>To make the data comparable across economies, a case study uses several assumptions about the business and the transaction.</td>
</tr>
<tr>
<td>• Extent of director liability index (0–10): Ability of minority shareholders to sue and hold interested directors liable for prejudicial related-party transactions; Available legal remedies (damages, disgorgement of profits, fines, imprisonment, rescission of the transaction)</td>
<td>The business (Buyer):</td>
</tr>
<tr>
<td>• Ease of shareholder suits index (0–10): Access to internal corporate documents; Evidence obtainable during trial and allocation of legal expenses</td>
<td>- Is a publicly traded corporation listed on the economy’s most important stock exchange. If there are fewer than ten listed companies or if there is no stock exchange in the economy, it is assumed that Buyer is a large private company with multiple shareholders.</td>
</tr>
<tr>
<td>• Extent of conflict of interest regulation index (0–10): Simple average of the extent of disclosure, extent of director liability and ease of shareholder indices</td>
<td>- Has a board of directors and a chief executive officer (CEO) who may legally act on behalf of Buyer where permitted, even if this is not specifically required by law.</td>
</tr>
<tr>
<td>• Extent of shareholder rights index (0–10): Shareholders’ rights and role in major corporate decisions</td>
<td>- Has a supervisory board in economies with a two-tier board system on which Mr. James appointed 60% of the shareholder-elected members.</td>
</tr>
<tr>
<td>• Extent of ownership and control index (0–10): Governance safeguards protecting shareholders from undue board control and entrenchment</td>
<td>- Has not adopted bylaws or articles of association that go beyond the minimum requirements. Does not follow codes, principles, recommendations or guidelines that are not mandatory.</td>
</tr>
<tr>
<td>• Extent of corporate transparency index (0–10): Corporate transparency on ownership stakes, compensation, audits and financial prospects</td>
<td>- Is a manufacturing company with its own distribution network.</td>
</tr>
<tr>
<td>• Extent of shareholder governance index (0–10): Simple average of the extent of shareholders rights, extent of ownership and control and extent of corporate transparency indices</td>
<td>The transaction involves the following details:</td>
</tr>
<tr>
<td>• Extent of minority investor protection index (0–10): Simple average of the extent of conflict of interest regulation and extent of shareholder governance indices</td>
<td>- Mr. James owns 60% of Buyer, sits on Buyer’s board of directors and elected two directors to Buyer’s five-member board.</td>
</tr>
</tbody>
</table>

The transaction involves the following details:

- Mr. James owns 60% of Buyer, sits on Buyer’s board of directors and elected two directors to Buyer’s five-member board.
- Mr. James also owns 90% of Seller, a company that operates a chain of retail hardware stores. Seller recently closed a large number of its stores.
- Mr. James proposes that Buyer purchase Seller’s unused fleet of trucks to expand Buyer’s distribution of its food products, a proposal to which Buyer agrees. The price is equal to 10% of Buyer’s assets and is higher than the market value.
- The proposed transaction is part of the company’s principal activity and is not outside the authority of the company.
- Buyer enters into the transaction. All required approvals are obtained, and all required disclosures made—that is, the transaction was not entered into fraudulently.
- The transaction causes damages to Buyer. Shareholders sue Mr. James and the executives and directors that approved the transaction.

Paying Taxes

This topic records the taxes and mandatory contributions that a medium-size company must pay or withhold in a given year, as well as the administrative burden of paying taxes and contributions and complying with postfiling procedures (VAT refund and tax audit). The most recent round of data collection for the project was completed in May 2018 covering for the Paying Taxes indicator calendar year 2017 (January 1, 2017 - December 31, 2017). See the methodology for more information.

What the indicators measure

<table>
<thead>
<tr>
<th>Tax payments for a manufacturing company in 2017 (number per year adjusted for electronic and joint filing and payment)</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Total number of taxes and contributions paid or withheld, including consumption taxes (value added tax, sales tax or goods and service tax)</td>
</tr>
<tr>
<td>• Method and frequency of filing and payment</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Time required to comply with 3 major taxes (hours per year)</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Collecting information, computing tax payable</td>
</tr>
<tr>
<td>• Preparing separate tax accounting books, if required</td>
</tr>
<tr>
<td>• Completing tax return, filing with agencies</td>
</tr>
<tr>
<td>• Arranging payment or withholding</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Total tax and contribution rate (% of commercial profits)</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Profit or corporate income tax</td>
</tr>
<tr>
<td>• Social contributions, labor taxes paid by employer</td>
</tr>
<tr>
<td>• Property and property transfer taxes</td>
</tr>
<tr>

</tr>
<tr>
<td>• Time to comply with a corporate income tax correction (hours)</td>
</tr>
<tr>
<td>• Time to complete a corporate income tax correction (weeks)</td>
</tr>
</tbody>
</table>

Case study assumptions

Using a case scenario, Doing Business records taxes and mandatory contributions a medium size company must pay in a year, and measures the administrative burden of paying taxes, contributions and dealing with postfiling processes. Information is also compiled on frequency of filing and payments, time taken to comply with tax laws, time taken to comply with the requirements of postfiling processes and time waiting.

To make data comparable across economies, several assumptions are used:

- TaxpayerCo is a medium-size business that started operations on January 1, 2016. It produces ceramic flowerpots and sells them at retail. All taxes and contributions recorded are paid in the second year of operation (calendar year 2017). Taxes and mandatory contributions are measured at all levels of government.

The VAT refund process:
- In June 2017, TaxpayerCo makes a large capital purchase: the value of the machine is 65 times income per capita of the economy. Sales are equally spread per month (1,050 times income per capita divided by 12) and cost of goods sold are equally expensed per month (875 times income per capita divided by 12). The machinery seller is registered for VAT and excess input VAT incurred in June will be fully recovered after four consecutive months if the VAT rate is the same for inputs, sales and the machine and the tax reporting period is every month. Input VAT will exceed Output VAT in June 2017.

The corporate income tax audit process:
- An error in calculation of income tax liability (for example, use of incorrect tax depreciation rates, or incorrectly treating an expense as tax deductible) leads to an incorrect income tax return and a corporate income tax underpayment. TaxpayerCo discovered the error and voluntarily notified the tax authority. The value of the underpaid income tax liability is 5% of the corporate income tax liability due. TaxpayerCo submits corrected information after the deadline for submitting the annual tax return, but within the tax assessment period.
Paying Taxes - Slovenia

</tbody>
</table>

Note: The ranking of economies on the ease of paying taxes is determined by sorting their scores for paying taxes. These scores are the simple average of the scores for each of the component indicators, with a threshold and a nonlinear transformation applied to one of the component indicators, the total tax and contribution rate. The threshold is defined as the total tax and contribution rate at the 15th percentile of the overall distribution for all years included in the analysis up to and including Doing Business 2015, which is 26.1%. All economies with a total tax and contribution rate below this threshold receive the same score as the economy at the threshold.

</table>

**Notes:**
- Names of taxes have been standardized. For instance income tax, profit tax, tax on company's income are all named corporate income tax in this table.
- The hours for VAT include all the VAT and sales taxes applicable.
- The postfiling index is the average of the scores on time to comply with VAT refund, time to obtain a VAT refund, time to comply with a corporate income tax correction and time to complete a corporate income tax correction.
- N/A = Not applicable.
Trading across Borders

Trading across Borders records the time and cost (excluding tariffs) associated with three sets of procedures—documentary compliance, border compliance and domestic transport—within the overall process of exporting or importing a shipment of goods. The most recent round of data collection for the project was completed in May 2018. See the methodology for more information.

<table>
<thead>
<tr>
<th>What the indicators measure</th>
<th>Case study assumptions</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Documentary compliance</strong></td>
<td>To make the data comparable across economies, a few assumptions are made about the traded goods and the transactions:</td>
</tr>
<tr>
<td>• Obtaining, preparing and submitting documents during transport, clearance, inspections and port or border handling in origin economy</td>
<td><strong>Time</strong>: Time is measured in hours, and 1 day is 24 hours (for example, 22 days are recorded as 22×24=528 hours). If customs clearance takes 7.5 hours, the data are recorded as is. Alternatively, suppose documents are submitted to a customs agency at 8:00 a.m., are processed overnight and can be picked up at 8:00 a.m. the next day. The time for customs clearance would be recorded as 24 hours because the actual procedure took 24 hours.</td>
</tr>
<tr>
<td>• Obtaining, preparing and submitting documents required by destination economy and any transit economies</td>
<td><strong>Cost</strong>: Insurance cost and informal payments for which no receipt is issued are excluded from the costs recorded. Costs are reported in U.S. dollars. Contributors are asked to convert local currency into U.S. dollars based on the exchange rate prevailing on the day they answer the questionnaire. Contributors are private sector experts in international trade logistics and are informed about exchange rates.</td>
</tr>
<tr>
<td>• Covers all documents required by law and in practice, including electronic submissions of information</td>
<td><strong>Assumptions of the case study</strong>:</td>
</tr>
<tr>
<td><strong>Border compliance</strong></td>
<td>- For all 190 economies covered by Doing Business, it is assumed a shipment is in a warehouse in the largest business city of the exporting economy and travels to a warehouse in the largest business city of the importing economy.</td>
</tr>
<tr>
<td>• Customs clearance and inspections</td>
<td>- It is assumed each economy imports 15 metric tons of containerized auto parts (HS 8708) from its natural import partner—the economy from which it imports the largest value (price times quantity) of auto parts. It is assumed each economy exports the product of its comparative advantage (defined by the largest export value) to its natural export partner—the economy that is the largest purchaser of this product.</td>
</tr>
<tr>
<td>• Inspections by other agencies (if applied to more than 20% of shipments)</td>
<td>- The mode of transport is the one most widely used for the chosen export or import product and the trading partner, as is the seaport or land border crossing.</td>
</tr>
<tr>
<td>• Handling and inspections that take place at the economy’s port or border</td>
<td>- All electronic information submissions requested by any government agency in connection with the shipment are considered to be documents obtained, prepared and submitted during the export or import process.</td>
</tr>
<tr>
<td><strong>Domestic transport</strong></td>
<td>- A port or border is a place (seaport or land border crossing) where merchandise can enter or leave an economy.</td>
</tr>
<tr>
<td>• Loading or unloading of the shipment at the warehouse or port/border</td>
<td>- Relevant government agencies include customs, port authorities, road police, border guards, standardization agencies, ministries or departments of agriculture or industry, national security agencies and any other government authorities.</td>
</tr>
<tr>
<td>• Transport between warehouse and port/border</td>
<td></td>
</tr>
<tr>
<td>• Traffic delays and road police checks while shipment is en route</td>
<td></td>
</tr>
</tbody>
</table>

Enforcing Contracts

The enforcing contracts indicator measures the time and cost for resolving a commercial dispute through a local first-instance court, and the quality of judicial processes index, evaluating whether each economy has adopted a series of good practices that promote quality and efficiency in the court system. The most recent round of data collection was completed in May 2018. See the methodology for more information.

<table>
<thead>
<tr>
<th>What the indicators measure</th>
<th>Case study assumptions</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Time required to enforce a contract through the courts (calendar days)</strong></td>
<td>The dispute in the case study involves the breach of a sales contract between 2 domestic businesses. The case study assumes that the court hears an expert on the quality of the goods in dispute. This distinguishes the case from simple debt enforcement.</td>
</tr>
<tr>
<td>• Time to file and serve the case</td>
<td>To make the data comparable across economies, Doing Business uses several assumptions about the case:</td>
</tr>
<tr>
<td>• Time for trial and to obtain the judgment</td>
<td>- The dispute concerns a lawful transaction between two businesses (Seller and Buyer), both located in the economy’s largest business city. For 11 economies the data are also collected for the second largest business city.</td>
</tr>
<tr>
<td>• Time to enforce the judgment</td>
<td>- The buyer orders custom-made goods, then fails to pay alleging that the goods are not of adequate quality.</td>
</tr>
<tr>
<td><strong>Cost required to enforce a contract through the courts (% of claim)</strong></td>
<td>- The seller sues the buyer before the court with jurisdiction over commercial cases worth 200% of income per capita or $5,000.</td>
</tr>
<tr>
<td>• Attorney fees</td>
<td>- The seller requests the pretrial attachment of the defendant’s movable assets to secure the claim.</td>
</tr>
<tr>
<td>• Court fees</td>
<td>- The dispute on the quality of the goods requires an expert opinion.</td>
</tr>
<tr>
<td>• Enforcement fees</td>
<td>- The judge decides in favor of the seller; there is no appeal.</td>
</tr>
<tr>
<td><strong>Quality of judicial processes index (0-18)</strong></td>
<td>- The seller enforces the judgment through a public sale of the buyer’s movable assets.</td>

Resolving Insolvency

Doing Business studies the time, cost and outcome of insolvency proceedings involving domestic legal entities. These variables are used to calculate the recovery rate, which is recorded as cents on the dollar recovered by secured creditors through reorganization, liquidation or debt enforcement (foreclosure or receivership) proceedings. To determine the present value of the amount recovered by creditors, Doing Business uses the lending rates from the International Monetary Fund, supplemented with data from central banks and the Economist Intelligence Unit. The most recent round of data collection was completed in May 2018. See the methodology for more information.

To make the data on the time, cost and outcome comparable across economies, several assumptions about the business and the case are used:

- A hotel located in the largest city (or cities) has 201 employees and 50 suppliers. The hotel experiences financial difficulties. The value of the hotel is 100% of the income per capita or the equivalent in local currency of USD 200,000, whichever is greater.
- The hotel has a loan from a domestic bank, secured by a mortgage over the hotel’s real estate. The hotel cannot pay back the loan, but makes enough money to operate otherwise.

In addition, Doing Business evaluates the quality of legal framework applicable to judicial liquidation and reorganization proceedings and the extent to which best insolvency practices have been implemented in each economy covered.

Labor Market Regulation

Doing Business presents detailed data for the labor market regulation indicators on the Doing Business website (http://www.doingbusiness.org). The report does not present rankings of economies on these indicators or include the topic in the aggregate ease of doing business score or ranking on the ease of doing business.

The most recent round of data collection was completed in May 2018. See the methodology for more information.

</tbody>
</table>

To make the data comparable across economies, several assumptions about the worker and the business are used.

**The worker:**
- Is a cashier in a supermarket or grocery store, age 19, with one year of work experience.
- Is a full-time employee.
- Is not a member of the labor union, unless membership is mandatory.

**The business:**
- Is a limited liability company (or the equivalent in the economy).
- Operates a supermarket or grocery store in the economy’s largest business city.
For 11 economies the data are also collected for the second largest business city.
- Has 60 employees.
- Is subject to collective bargaining agreements if such agreements cover more than 50% of the food retail sector and they apply even to firms that are not party to them.
- Abides by every law and regulation but does not grant workers more benefits than those mandated by law, regulation or (if applicable) collective bargaining agreements.

Business Reforms in Slovenia

In the past year, Doing Business observed a peaking of reform activity worldwide. From June 2, 2017, to May 1, 2018, 128 economies implemented a record 314 regulatory reforms improving the business climate. Reforms inspired by Doing Business have been implemented by economies in all regions. The following are reforms implemented since Doing Business 2008.

Doing Business = Doing Business reform making it easier to do business. × = Change making it more difficult to do business.

DB2019

× Starting a Business: Slovenia made starting a business more complicated by requiring companies to report their beneficial ownership separately from business incorporation.

✓ Enforcing Contracts: Slovenia made enforcing contracts easier by introducing a pre-trial conference as part of the case management techniques used in court.

DB2018

✓ Getting Credit: Slovenia improved access to credit information by reporting both positive and negative data on consumers and commercial borrowers.

DB2015

✓ Resolving Insolvency: Slovenia made resolving insolvency easier by introducing a simplified reorganization procedure for small companies and a preventive restructuring procedure for medium-size and large ones, by allowing creditors greater participation in the management of the debtor and by establishing provisions for an increase in share capital through debt-equity swaps.

DB2014

✓ Dealing with Construction Permits: Slovenia made dealing with construction permits easier by eliminating the requirement to obtain project conditions from the water and sewerage provider.

Labor Market Regulation: Slovenia abolished priority rules for reemployment, changed the notice period and severance pay provisions for redundancy dismissals and increased the minimum wage.

DB2013

✓ Protecting Minority Investors: Slovenia strengthened investor protections through a new law regulating the approval of related-party transactions.

✓ Paying Taxes: Slovenia made paying taxes easier and less costly for companies by implementing electronic filing and payment of social security contributions and by reducing the corporate income tax rate.

✓ Resolving Insolvency: Slovenia strengthened its insolvency process by requiring that the debtor offer creditors payment of at least 50% of the claims within 4 years; giving greater power to the creditors' committee in a bankruptcy proceeding; prohibiting insolvency administrators from allowing relatives to render services associated with the bankruptcy proceeding; and establishing fines for members of management that violate certain obligations or prohibitions.

DB2012

✓ Registering Property: Slovenia made transferring property easier and less costly by introducing online procedures and reducing fees.

✓ Trading across Borders: Slovenia made trading across borders faster by introducing online submission of customs declaration forms.

✓ Resolving Insolvency: Slovenia simplified and streamlined the insolvency process and strengthened professional requirements for insolvency administrators.

DB2011

✓ Starting a Business: Slovenia made starting a business easier through improvements to its one-stop shop that allowed more online services.

✓ Registering Property: Greater computerization in Slovenia's land registry reduced delays in property registration by 75%.

✓ Paying Taxes: Slovenia abolished its payroll tax and reduced its corporate income tax rate.

DB2010

✓ Starting a Business: Slovenia made starting a business easier by speeding up company registration, combining tax registration with company registration through the automated e-Vem system and abolishing the requirement for a company seal.
DB2009

✔ **Starting a Business**: Slovenia reduced the time and number of procedures to start a business by introducing a single access point for the process of establishing a limited liability company.

✘ **Getting Credit**: Slovenia weakened its secured transactions framework by decreasing secured creditors’ rights during reorganization procedures but also improved access to credit information by starting operations at the new private credit bureau (SISBON).

✔ **Protecting Minority Investors**: Slovenia strengthened investor protections by allowing minority investors to initiate suits against directors on behalf of the company in order to defend their rights as shareholders.

**Labor Market Regulation**: Slovenia decreased the notice period applicable in cases of redundancy dismissals.

DB2008

✘ **Getting Credit**: As a result of the introduction of the euro in Slovenia, its public credit registry increased the minimum threshold for loans included in its database from 0 to €500, reducing access to credit information.

✔ **Protecting Minority Investors**: Slovenia strengthened investor protections through a new provision requiring that a company’s board of directors obtain prior shareholder approval for transactions representing 25% or more of the company’s assets.

✔ **Paying Taxes**: Slovenia made paying taxes less costly for companies by reducing the payroll tax rate.

**Labor Market Regulation**: Slovenia reduced the maximum cumulative duration of fixed-term contracts.
Doing Business 2019 is the 16th in a series of annual reports investigating the regulations that enhance business activity and those that constrain it. The report provides quantitative indicators covering 11 areas of the business environment in 190 economies. The goal of the Doing Business series is to provide objective data for use by governments in designing sound business regulatory policies and to encourage research on the important dimensions of the regulatory environment for firms.
